Standard Vendor Agreement & Procurement Terms

Document Owner: Procurement Department | Effective Date: January 1, 2026 | Version: 2.4

1. Scope

This document sets out the standard commercial terms that apply to all vendors, suppliers, and contractors supplying goods or services to ChannelBoost Inc. under a Purchase Order (PO). Terms in an individually negotiated master services agreement take precedence over this standard agreement where they conflict.

2. Vendor Tiering

Vendors are classified into one of three tiers by Procurement based on annual spend, strategic importance, and length of relationship:

Vendor Tier	Typical Criteria	Standard Payment Terms
Strategic Partner	High annual spend, multi-year relationship, critical to core operations	Net 60
Preferred	Established relationship, consistent order volume	Net 45
Standard	New or lower-volume vendors	Net 30

3. Payment Terms

Payment terms are set at the individual contract level and recorded on the vendor's active Vendor Contract record; the table in Section 2 reflects the standard mapping applied when a contract is issued or renewed. A vendor is eligible for **Net-60 (60-day) payment terms** if and only if it holds an active contract with the **Strategic Partner** tier designation. Preferred-tier vendors receive Net-45 terms by default; in limited cases a Preferred vendor may negotiate an exception up to Net-60, which will be reflected explicitly on that vendor's contract record. Standard-tier vendors receive Net-30 terms. The payment due date for any invoice is calculated as the invoice date plus the number of days specified in the applicable payment term.

4. Early Payment Discounts

Vendors may offer an early payment discount (typically 1-2.5%) in exchange for payment within 10 days of invoice date, as recorded on the individual vendor contract. Finance will apply an available early payment discount automatically when cash flow permits, prioritizing Strategic Partner vendors.

5. Invoicing Requirements

Vendor invoices must reference a valid, open ChannelBoost Purchase Order number and itemize quantities and unit costs matching the PO. Invoices that do not match the corresponding PO within a 2% variance will be held for reconciliation before payment is scheduled. Invoices become overdue if not paid within the applicable payment term from the invoice date; overdue balances do not accrue interest but are escalated to the Procurement Manager for vendor relationship review.

6. Contract Term & Renewal

Standard vendor contracts run for a term of 24 months from the effective start date. Contracts are reviewed by Procurement no later than 60 days prior to expiration; a contract that lapses without renewal reverts the vendor to Standard tier and Net-30 terms until a new contract is executed.

7. Quality & Delivery

Vendors are expected to meet the expected delivery date specified on each Purchase Order. Repeated late deliveries (more than 3 in a rolling 12-month period) may result in tier downgrade at Procurement's discretion, independent of spend volume.

8. Termination

Either party may terminate a vendor contract with 90 days' written notice. ChannelBoost reserves the right to terminate immediately for material breach, including failure to meet quality standards, financial insolvency of the vendor, or violation of ChannelBoost's Supplier Code of Conduct.
